## Houzz home design remodel

Ramshackle Glam Most of us want to have a larger bedroom closet. One problem is that apparently the cabinets are in the box in all three sides with walls. The walls cannot be moved. Or can I? Continue with 2 of 24 below. Ramshackle Glam This owner studied her closet and realized that, like many closets in bedrooms that share a wall with another bedroom, it is essentially a closet. A single wall of non-bearing divider cuts the large cabinet in half and turns it into two smaller cabinets. Taking down the middle wall, he instantly doubled the space in the closet. Double-the-Size Closet Makeover from Ramshackle Glam Continue to 3 of 24 below. Murray Lampert If no one is interested in using the island of your home kitchen, it could be because the island is not interesting. Except that it's a place to give up mail and shop, this kitchen island had no redeeming qualities, nothing to attract people to it. On top of that, dark kitchen cabinets and pendant lights made this antiquated kitchen feel bleak. San Diego builder and designer Murray Lampert was tasked with turning this kitchen around and making it a showpiece. Continue with 4 of 24 below. Murray Lampert With the kitchen island transformed into a breakfast bar, guests have a reason to gather in the kitchen. An extra overhang countertop allows guests to stay closer to the bar. The needs of the chef are also addressed with a sink installed in the kitchen island. Dated pendant lights have been stripped in favor of discreet recessed lights. And clean lines are preserved with counter-deep side-by-side refrigerator. Continue with 5 of 24 below. Influx Productions/Getty Images old-school dial thermostats, would be the classic Honeywell Round do not have a certain vintage appeal. But it seems to count for nothing when it comes to saving money. Manual thermostats are known for energy and money-wasters because they rely on you to physically adjust the temperature. Continue with 6 of 24 below. Smith Collection/Gado/Getty Images If you're looking for a quick remodeling idea that you can accomplish in less than an hour, install a programmable thermostat. These digital smart thermostats can be programmed to start or start the heating or cooling system at certain times during the day and night. Most have a holiday mode that allows you to reduce the need for the HCV system during long periods of absence. Continue with 7 of 24 below. Led by Decor This living room had so many problems that design blogger Kris barely knew where to start. The red urid felt imposing, and the ceiling seemed too low. Everything was disorganized and needed a serious update. Continue with 8 out of 24 downstairs. Led by Decor Two important remodeling ideas are at stake in this living room. First, the owner has imposed clean lines, like the grid on the accent wall, so that everything works on horizontal straight and vertical. The grid involves order and organization. Second, by painting over which the color of the red wall to match the ceiling the eye is now encouraged to see the room as being larger than it really is. Removing these horizon lines is a sure way to promote height images. Light is a Ganador 9-Light Shaded Chandelier. Family Room Reorganization from Run by Decor Continue to 9 of 24 below. Eating bird food that lonely fridge is good for keeping food cold. But suck a lot of floor space, plus there is a lot of room above and the side that could be used for storage. Continue with 10 of 24 below. Eating bird food the brilliant solution for space-losing refrigerators is to install pantry units to one side and above the refrigerator. This extensive storage space wraps around the refrigerator and produces a clean and integrated look. Slide-out pantry shelves help in touching food because the fridge pantry tends to be very deep. Wall cabinets definitely have great utility. The objects are right there, out of reach of the arm. And wall closet doors hide items that are less attractive. However, wall cabinets can loom over the work area, casting a shadow and generally creating a weighty look. Continue with 12 of 24 below. DIY Playbook Open shelves replace the former wall cabinets in this kitchen. Shelves clearly open the kitchen of that dark, hard look and make everything feel lighter and brighter. The owner warns that it is a move to be made with great thought, however. Make sure you already have storage space for items that will lose your home. Another idea is simply to thin much of the unused, unloved junk from wall cabinets, reducing the need for alternative storage. Kitchen Open Shelves from DIY Playbook Continue at 13 of 24 below. Should the house of Hepworths paint brick or not? What makes this such a lively debate is that once you paint the brick, it is largely irreversible, because the complete removal of brick paint is almost impossible. But when you have brick so ugly you can't even stand to look at it? And for this owner, the large size of the fireplace has made things worse. Continue with 14 of 24 below. The house of Hepworths Brick painting does not have to be difficult. This owner barely did any preparation work, and she limited her painting to anything could be rolled out. The result is a fresh-looking fireplace that is easy for the eyes. Painted white fireplace at The hepworths House continues at 15 of 24 below. Larger than the three of us For small bathrooms and powder rooms, a corner arrangement is inevitable. The narrow walls and limited floor space dictate that the vanity of the bathroom and mirror should be trapped in this space, if only because it is the only space available. In this bathroom, the yellow wall was garish and dirty, and cabinets were chipped. This corner needed help. Continue with 16 of 24 below. Bigger than the three of us is cost a package or take a long time to refurbish the bathroom corner. For less than you might spend for a beautiful evening outside, you can paint bathroom cabinets, install new hardware, paint the walls, replace the light vanity, and put in a new carpet along with other pretty décor. Terraces are central assembly points. They bring friends and family together in the big outdoor for barbecues, drinks, dog date, or whatever your heart desires. But when the terrace is far from beautiful and invaded by neglected plants, no one wants to be there. Continue with 18 of 24 below. Fairly cautious Set new concrete pavers to define a sharp, new patio area and add a portable firepit as a focal point. Above all, cutting back the foliage too high is the lowest cost method of sprucing up your terrace. Patio Remodel from Pretty Prudent Continue at 19 of 24 below. Sugar and cloth It is always best when the dining room has a cohesive design plan. But for this owner, the dining room felt random, with lots of inappropriate furniture that reminded him of college dorm rooms. Continue with 20 of 24 below. Sugar and cloth With this amazing dining room makeover, color scheme ties together, so everything now works in harmony. The pieces were specially chosen for the new space, from cheap cast plastic seats to the modern mid-century sideboard. Just one item from the forward remains: basket bar. What really makes this renovated dining room work, though, is the introduction of a focal point: the declaration chandelier. The Makeover Dining Room from Sugar and Cloth Continue to 21 of 24 below. Homebody on the move What has worked in the past doesn't necessarily work today. The tub planted in a truly cramped alcove, plus the lack of a shower, made using this bathroom a sad business. Continue with 22 of 24 below. Homebody in Motion The owner opened this bathroom, making it more airy and open, by removing the alcove tub and extracting the claustrophobic alcove. Then he installed a bathtub. To meet today's needs, she also added a glass shower without frame. Frameless glass casings make the bathrooms feel bigger and less imposing. Vintage Bathroom

This owner loved them for many years, until she felt it was time for a change. Given the high cost of kitchen cabinets, removal and replacement were out of the question.
